PowerSecure Solutions for
Healthcare Facilities

Reliable, NFPA 110 Level 1 Compliant Standby Power

PowerSecure understands that the reliability of standby power is nowhere more critical than in healthcare situations. We also understand that containing costs and getting maximum value for every dollar you spend is another top priority.

Our engineering group has a combined 75+ years of experience in the healthcare industry. Merging that expertise with our deep utility relationships and technical acumen in key areas like permitting and emissions, we develop standby power systems that meet the specific requirements of healthcare facilities – superior reliability, ease of use and return on investment.

PowerSecure Reliability – Best in the Industry

Third-party audits of our database – comprising more than 50,000 datapoints from more than 1,600 systems deployed across the U.S. – confirm that PowerSecure holds the industry record for backup power reliability. PowerBlock system features include the following:

• Full system capacity that comes online and serves load in less than 10 seconds, regardless of system size

• 24/7 PowerControl monitoring with built-in regulatory compliance software and reporting

• Exceptional value: full standby backup power plus additional ROI potential through utility demand response programs

When you buy a standby power system from PowerSecure, you don’t simply buy equipment – you invest in a solution. Our turnkey PowerBlock solutions reflect our whole-system, integrated approach. We package our generators, proprietary switchgear and PowerControl monitoring software to eliminate the uncertainties inherent in systems that incorporate elements from different manufacturers.

“PowerSecure has been serving our standby needs since 2001. They are simply the best in the business.”
— Director of Facilities,
South Georgia Medical Center

Technical Expertise and Healthcare Sector Experience: A PowerSecure Power Match

To answer the specialized system, code and reliability requirements of the healthcare industry, PowerSecure has built a team of registered healthcare system experts dedicated to developing solutions for hospitals. Like no other system available, our signature PowerBlock standby power solution provides:

- Flexible, fully modular designs
- Complete turnkey delivery: engineering design, manufacturing, construction, ongoing maintenance and 24/7/365 system monitoring
- NFPA 110 Level 1 compliance with automated NFPA 110 testing, logging and reporting for CMS accrediting agency compliance
- Multiple fuel options
- Demand response, load management and peak shaving opportunities
